1 MEANING OF ENTREPRENEURSHIP: Entrepreneurship may be defined as the visualization and realization of new ideas by insightful individuals, who are able to use information and mobilize resources to implement their v1s1on. Entrepreneurship is the ability (i.e., knowledge plus skills) of a person to translate ideas of commencing a business unit into reality by setting up a business on ground to serve the needs of society and the nation, in the hope of profits.

DEFINITION OF ENTREPRENEURSHIP

Wennekers and Thurik have probably provided the most elaborate and inclusive definition: Entrepreneurship is the manifest ability and willingness of individuals, on their own, in teams, within and outside existing organizations to perceive and create economic opportunities (new products, new production methods. new organizational schemes and new product-market combinations). and to new introduce their ideas in the market, in the face of uncertainty and other obstacles,

CHARACTERISTICS OF ENTREPRENEURSHIP i) Entrepreneurship is an economic activity done to create, develop and maintain a profit-oriented business.

- ii) It begins with identifying an opportunity as a potential to sell and make profit in the market.
- iii) Entrepreneurship is the best utilization of available resources.
- iv) Entrepreneurship is the ability of an enterprise and an entrepreneur to take risk.

What Is an Entrepreneur?

An entrepreneur is an individual who creates a new business, bearing most of the risks and enjoying most of the rewards. The process of setting up a business is known as entrepreneurship. The entrepreneur is commonly seen as an innovator, a source of new ideas, goods, services, and business/or procedures.

Entrepreneurs play a key role in any economy, using the skills and initiative necessary to anticipate needs and bringing good new ideas to market. Entrepreneurship that proves to be successful in taking on the risks of

Department of CSE Page 1 of 35

creating a <u>startup</u> is rewarded with profits, fame, and continued growth opportunities.

A nlost appropriate definition of entrepreneur is that, "he is a ,nan in interpreneur is that," in the is a ,nan in detects oncl evaluates a new J situation in his environment nnd directs the ,naking of such adjustnlents in the economic systelns as h deelns necessary".

In actual practice the ter1n "entrepreneur" is attributed to all snzczll industrialists, snzall business, nen, and traders. All people ivho are gai, fully engaged in i.uork of n1a11iifacturi11g, distribution or service and other sectors are colled entrepreneurs.

Entrepreneur - Meaning and Definition

A.l.1 entrepreneur is 011e ""ho innovates, raises money, asse1nbles inputs, cl1ooses 1nanagers a11d sets tl1e organisation going \-Vith l1is ability to identify them. Innovation occurs tl1rough

- a) The introduction of a ne\v quality product,
- (b) A.. nevv product,
- (c) A discovery of a fresh den1and and a fresh source of supply, and
- d) By changes in the organisation and 1nanage1nent.

A most appropriate definition of entrepreneur is that, "he is a n1an "ho detects and evaluates a ne,v situation in his environment and directs the 1naking of such adjustn1ents in the economic systems as he deems necessary".

An entrepreneur perfor1ns one or more of the following:

- (i) Perceives opportunities for prof table invest1nents,
- (ii) Explores the prospects of starting a manufacturing enterprise,

(iii) O_!)tains necessary industrial licenses,

Department of CSE Page 2 of 35

- (iv) Arranges initial capital,
- (v) Pro, ides personal guarantees to the financ-ial institution,
- (, i) Pron1ises to 111eet the shortfalls in the capital, and
- (, ii) Supp]ies technical knovv-hovv.

Entreprene11r - Concept

To trace the genesis of the word entrepreneur it would be prudent to look at word 'entrepredre' in French which literally means "betvveen-taker" or "go- between." The theoretical growth of the concept of entrepreneurship has taken place side by side with growth of tenn itself.

In the early 18th century French economist Richard Cantillon used the term entrepreneur to business. Entrepreneur was a dealer who purchases the means of production for combining the 1 min to marketable products. Since then the word entrepreneur refers to one who takes the risk of starting a ne,v organization or introducing a new idea, product or service.

Entrepreneur is the most important factor in the process of economic development. He occupies the central place in the grovvth process because he initiates development in a society and carries it forward. As a change agent, the entrepreneur is the first and foremost a catalyst for change.

The function that is specific to entrepreneur is the ability to take the factors of production-land, labour and capital and use then1 to produce new goods or services. The entrepreneur perceives opportunities. I-fe works as an originator of a ne,v business venture and also tries to improve an organisation unit by initiating productive changes.

Department of CSE Page 3 of 35

Entrepreneur - Nature.

The entrepreneur is expected to 1dent1fy the env1ronmental change as an opportunity and uses the factors of production to produce ne\r goods and services.

He is motivated to:

- (i) The desire to find a private commercial kingdom,
- (ii) The will to conquer and prove his superiority and,
- (iii) The joy of creating, getting things done or simpl) of exercising one's energy and ingenuity.

Broadly the three main views are:

1. Entrepreneur as a Risk Bearer:

'Richard Cantillon' (Irish) "vas the first person \\ ho introduced the term 'entrepreneur' and his unique risk-bearing function in economics in the early 18th century. He defined entrepreneur as an agent "who buys factors of production at certain prices in order to combine them into a product ", the vie\\ to selling it at uncertain prices in future. Thus, it is a risk bearing activit).

2. Entrepreneur as an Organiser:

Jean-Baptiste say, developed the concept of entrepreneur b) associating it with the functions of co-ordination, organization and supervision. According to him an entrepreneur is one,, ho combines the land of one, the labour of another and capital of yet another and thus produces a product.

By selling the product in the market, he pays interest on capital, rent on land and vvages to labourers and vhat remains is his/her profit.

Thus an entrepreneur is an organiser.

3. Entrepreneur as an Innovator:

Joseph A. Schumpeter" in 1934, assigned a crucial role of innovation' to the entrepreneur. He considered economic development as a dynamic change brought by entrepreneur b_nstituting new combinations of factors of production, i.e., innovations.

The introduction of new combination of, according to hiin, may occur in any of the follo,-ving forms:

(a) Introduction of new product in the market.

Department of CSE Page 4 of 35

- (b) Use of a new production technology.
- (c) Opening of a new market.
- (d) Discovery of a nevv source of supply of raw materials.

Defirition:

Thus an Entrepreneur can be defined as a person who tries to create something new, organises production and undertakes risks and handles economic uncertainty involved in enterprise, e.g., Ambani, Tata, Birla,

Entrepreneur - Skills Required for an Entrepreneur

An entrepreneur needs intuition, creative thinking and innovative ability. Entrepreneurs were not born; they learned to become entrepreneurs. They can learn and improve their skills through various training program 1 es for entrepreneurs.

The following skills are required for an entrepreneur:

- 1. Conceptual An entrepreneur has the ability to identify relationships quickly in the 1 nidst of complex.situations. He identifies problems and begins to work in their solution faster than other people.
- 2. Technical A good entrepreneur should have interest to explore new ideas, nevv technology and new production 1nethod. He must have a reasonable level of technical knowledge.
- 3. Human Relation An entrepreneur should nlaintain good relations with his customers and the public. He must also lnaintain good relations with his employees to motivate the ln to higher levels of efficiency.
- 4. Communication Communication of an entrepreneur must be to the point, crisp and convincing. Communication ability is the secret of the Tsuccess of most entrepreneurs.
- 5. Decision-making It means the ability to choose the correct alternative from a numbers of alternatives. An entrepreneur should have the ability to analyse the various aspects of the business to arrive at a decision.
- 6. Managerial An entrepreneur should have the skill to manage the men and other factors of production. He should be able to select, train and maintain the persons colnposing of labour force.

Department of CSE Page 5 of 35

- 7. Time Management Time Mana ement is the act or proc: **?f** ercising continuous control over time spent on specific act1v1t1es. ex. This is necessary to increase efficiency or pro uct1v1ty. entrepreneur must possess this skill to manage the time.

 8. Stress Management Stress management is one of the ke) s to a happy and successful life in modern society. It is the best wa to manage anxiety and maintain overall well-being. Entrepreneur must be able to adopt various mechanisms to control the level of stress.

 9. Personality and Individual skill Impressive personalit) and individual skill help to de\ elop entrepreneurship. These qualities are inevitable for entrepreneurs since they have to \\Ork \\1th officers, engineers, labourers, customers, investors, Govt. officers, etc.
- 10. Pioneering Entrepreneurs ha, e the skill to explore into new opportunities. They ah, a) s like disco, er ne,\ methods of production and new markets. Thus, the) are pioneers **in** their o,\ n field.

 11. Unification and Organization An entrepreneur comes in contact with many unions and organizations. He has to arrange many things **in** many,, a)sand to unite all of them for a common goal. So, he must have unification and organization skills.

 12. Computer kno\dedge If an entrepreneur is computer literate he can use the computers and software to perform different aspects of his jobs. Computer is a helpful tool for decision-making. Some important applications of the internet are e-mail, telnet, acquiring software and world-wide web.

Entrepreneur - Functions: Innovation, Risk-Taking, Organisation and Management, Business Decisions Function# 1. Innovation:

Innovation means doing the new things or the doing of things that are already being done in a new way. This innovation is the process of doing new things. However, there is distinction between creativit) and innovation. Creativity is the ability to bring something new into existence.

Department of CSE Page 6 of 35

Prac!ically, _it is the ab_ility, n?t the activity of bringing something new into existence. It 1s possible for a person to conceive of something ne"v and e vision how t will be useful but not necessarily take the necessary action to make 1t a reality.

It is also possible that ideas generated in the mind of a man have little value until they are converted into new products, services or processes. But "innovation is the transformation of creative ideas into useful applications but creativity is a prerequisite to innovation."

Schumpeter described entrepreneurs as innovators who use the process of shatter the status quo through new combinations of resources and new method of commerce. It includes new processes of production, introduction of new products, and creation of new markets, discovery of a new and better form of industrial organisation.

Peter Drucker also elaborates that innovation is the specific tool of entrepreneurs the means by "vhich they exploit change as an opportunity for a different business or a different service. It is capable of being presented as a discipline, capable of being learned, capable of being practiced.

Entrepreneurs need search purposefully for the sources of innovation, the changes and their symptoms that indicate opportunities for successful innovation. They need to kriow and to apply the principles of successful innovation. Thus, innovation is the development process. It translates an idea into an application. It requires entrepreneur to work out the detail of product design or service analytically, to develop rnarketing, obtain finance and plan operations.

Function#2. Risk-Taking:

The risk is the condition of not knowing the outcome of an act1v1ty or decision. Nevertheless, risk is capable of being evaluated_for. relative probabilities. Risk bearing means provision for capital in order to enable the entrepreneur to establish and operate the business

Economi.sts like Cantillon. J.B. Say and others stressed ris_k talon_gd as the specific function of an entrepreneur. For trepreneur is require

Department of CSE Page 7 of 35

to reduce uncertainty in his investn1ent strategics by initiating expansion and diversification prograinn1es in the enterprise. In this connection, Drucker observed thatentrepreneurial behaviour i\$ risky because so few of the so-called entrepreneurs know what they are doing.

The) lack the n1ethodology. They violate ele1nentary and well-1 known rules. So, entrepreneur should try to reduce the level of uncertainty by analysing the problen1 in proper perspective.

E Actually, "business gan1e consists of great risks and rewards are also great when risks are successfully covered. The ability to perfonn services and the risks involved are inseparable. Therefore, for services and the risks involved are inseparable. Therefore, for services fully covering the risks, highest order of ability is required. As successful entrepreneur would be one who has trait, patience, desagacity, power of observation and wisdom and ability of descrimination. I-Ie should be mentally alert, gifted with it discerninent, practically acute-111 inded, shrewd and an exceptionally Tentelligent person."

- the Thus, entrepreneurs are required to perfonn this function-risk at taking as \.Yell as risk bearing at the sanle time. They are the owner as well as executor of the business enterprise.
- T Function # 3. Organisation and Management:
- ar The process of organisation and management includes planning of $^{\rm M}$ an enterprise coordination, control and supervision. Prof. Alfred $^{\rm en}$ Marshal recognised this function as an important function of an $^{\rm Er}$ entrepreneur.
- the Entrepreneurs often fall into the trap of thinking that just because system their business is s1nall, they do not really need a comprehensive by system of organisation and management. They may rationalise that by designing an effective organisational and n1anagement control system or they cannot iinprove their capabilities because of their limited knowledge about possible 111ethods of e.ffec ive contr_o.l. But entrepreneur are expected to develop an effective orga 1sat1on and management system in the organisation. They have to 1nte:actdi ectly 'v\rith einployees and exchange nform rtion abo_ut_wh_t1s

going on in the firn₁. They tend to be directly 1n:olv d 1n then organisation's operational activities to ensure effective control. They

Department of CSE Page 8 of 35

are expected to fonnulate plans, produc.:Liun strategies, u1d fin;1nd:Jl manage1nent and develop n1urkcLing channels and n1wwgt1ntn,l >f' personnel.

Function# 4. Business Decisions:

Arther H. Cole described an entrepreneur as a decision m,1k, r. 'f'h,; decisions with regard to what to produc.:c, how lo produc.e and f' < Jr who1n to produce are to be taken by the entrepreneur himself. *In* this connection, he has to i111plement his innovc1Livc proc:ess.

Prof. Cole described the functions of an entrepreneur c:1s:

- (i) The determination of those objectives of the *en* terprise and th; change of those objectives as conditions required or made advantageous;
- (ii) The development of an organisation including efficient reJaUonf with subordinates and all employees;
- (iii) The securing of adequate financial resource, the relations with existing and potential investors;
- (iv) The requisition of efficient technological equipment and the revision of it as new machinery appeared;
- (v) The development of a market for products and the devising of a new product to meet or anticipate consumers demand;
- (vi) The maintenance of a good relations with public authorities and with society at large. Thus, the entrepreneur is an institution himself and he performs various functions related with organisation development and management control. He is supposed to bear the risk, manage, innovate, organise and take decisions with regard to his business empire.

Eight traits of an entrepreneu

Entrepreneurs have an eye for innovative business opportunities anda desire to drive change, but they can also have a range of personality types and come from all kinds of backgrounds. So what defines a great startup founder? Find out which essential skills and characteristics every small business owner needs to become a successful entrepreneur.

1. Leadership

One of the most important characteristics of an entrepreneur is the ability to lead. You'll need to function as the head of your company, the manager of your team, and the trailblazer who keeps everyone moving forward as your launch approaches. Yqu'll also need to take the helm when it comes to pitching to investors or talking with the press. Be prepared to forge new paths and build a team of devotees as the face of your business.

2. Vision

Entrepreneurs who are truly blazing new trails always have a v1 ron in mind. How will your company change the indust_ry, and_ ho_w will you the ways customers do business_ or Irv their. lives? Most market improve e seeking impressive levels of rnnovat1on, which could be investo.rs are sting products or bringing somet in somet in some to improving on ex1 ver ou're selling, you'd better be prepared t?. show the market. Whate Yh much better things look in your v1s1on of investors and customers ow the future.

3. Motivation

ders are endlessly driven. They havea The most success'.ul startup fou: to do more, work harder, and_perfor knack for motivating themse_lve::,moment. Department of CSE Page 10 of 35

Promotion: Building your business is virtually impossible on one knows a out 1t, so promoting yourself and your company 1s crucial. Tat doesn timean you have to turn every conversation into a sales pitch, though. Become a company evangelist and maste r self-promo tion in a way that wins over friends and investors alike.

Money management: Whether you're in it for the money or you truly want to change your industry, you have to learn how to manage money wisely. Even if you delegate the bulk of this task to an experienced accountant, you need to have a sense of what's coming in, what's going out, and whether you're meeting your goals.

How to become an entrepreneur

Starting a business might sound like a daunting proposition if you don't know where to begin. Follow these steps to become an entrepreneur in any indu5try.

Become an expert: The best startup founders know their field like the back of their hand. Take the time to become an expert in your industry, whether that means taking classes, getting experience at other businesses, or doing market research. Develop a reputation as an expert by networking, giving talks, and writing thoughtful articles.

Make a plan: Startups don't usually fall out of thin air. To get a startup off the ground, you'll need to create a detailed business plan, complete with product launches and profit-and-loss projections for each stage. You'll also need to illustrate how your company differs from competitors and set yours up to be the best in the business.

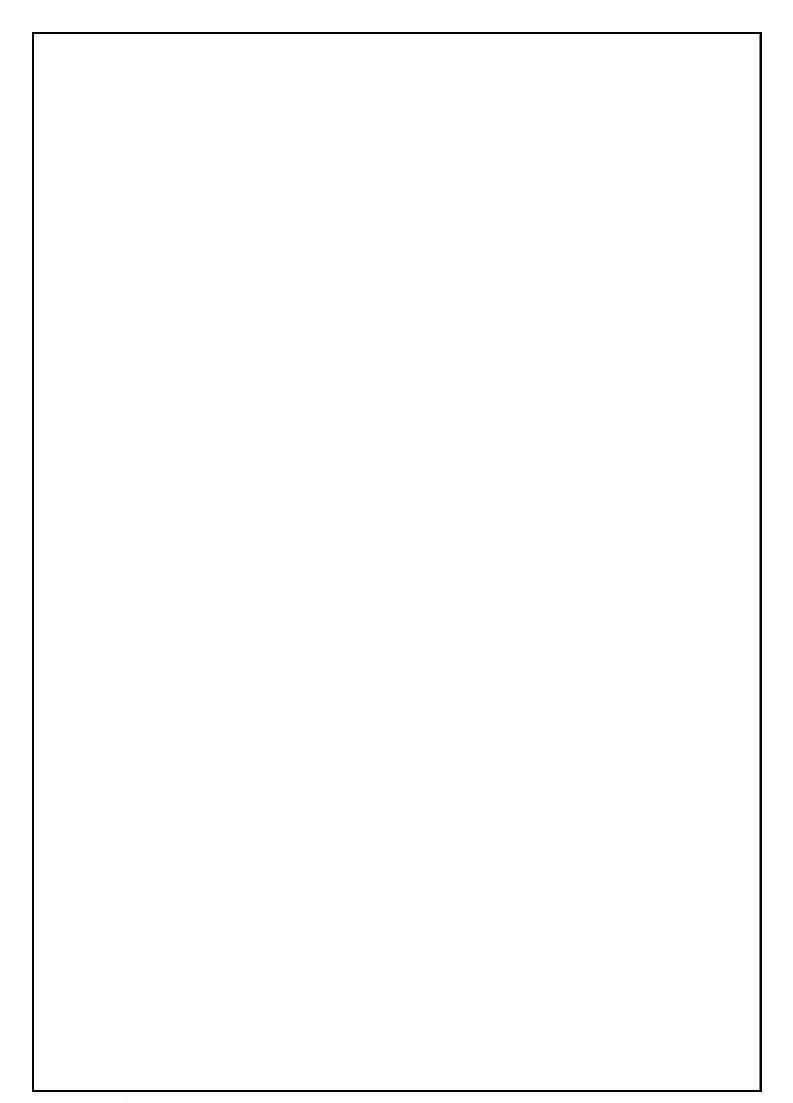

Seek out a mentor: Even if you think you know what you're doing, you're likely to benefit greatly from having a relationship with a business owner or an industry expert who has been in your shoes before. Not only will you have someone to bounce ideas off of or solicit advice from, but you'll also *have* someone else in your corner, cheering you on.

Build a team: You'll need much more than a mentor to create that code or launch that product. Get out there and build a team of dedicated workers and innovative employees who can I1elp you shape your company's vision.

. he

Learn how to move on from failure: Almost every startup in book has experienced both small and large fa; ures.

understan d h ow to do damage control, learn from your mistakes and move your company forward after a major glitch.

Not everyon is cut out to be a boss, transform the market, or launcha groun brea ing product. With a solid roadmap, important skills, and eight essential traits of an entrepreneur, you'll have v hat it takes to become an effective business owner.

Who is a Manager?

A manager, on the other hand, is not an owner of an enterprise. Instead, he is the one that is responsible for the management and administration of a group of people or a department of the organization. His day to day job *is* to manage *his* employees and ensure the organization runs smoothly.

A manager must possess some of the same qualities as an entrepreneur, like leadership, accountability, decisiveness etc. He must a]so be a good manager of people. So qualities such 4x armth and empathy are also very important in a manager.

Now that we have a brief idea about their qualities and roles, let us take a look at the difference between them

Department of CSE Page 13 of 35

Entrepreneur vs Manager	
Entrepreneur	Manager
Entrepreneur is visonary and bears all financial risks.	r 1anaoer i,orks fo 1 5::13 ry ard does no - have to bear any nsks.
Focuses on starrting and expanding the business ideas	Focus on daily sn oott1 functioning of business
Key motivation or Entrepreneur is achievments	f,,1angers motivation come fror = e po\.•:er tha comes 'vVittl heir po::.r rc.n
Reward for all the efforts is protlt he earns from the enterprise	Remunera ion is the salary he dra\;vs from the compan '
and casual	very formal

Difference between Entrepreneur and Manager

- The key difference between an entrepreneur and a manager is their standing *in* the company. An entrepreneur is a visionary that *converts* an *idea into* a business. He *is* the owner of the business, so he bears all the financial and other risks. A manager, on the other hand, is an employee, he works for a salary. So he does not have to bear any risks.
- The focus of an entrepreneur lies in starting the business and later expanding the business. A manager will focus on the daily smooth functioning of the business.
- For an entrepreneur the key motivation is achievements. But for the managers, the *motivation* comes from the power that comes with their position.
- The reward for all the efforts of an entrepreneur is the profit he earns from the enterprise. The manager is an employee, so his remuneration is the salary he draws from the company.

Department of CSE Page 14 of 35

7

• The entrepreneur can be informal and casual in his role. However,a - manager's approach to every problem is very formal.

 The entrepreneur by nature is a risk taker. His has to take calculated risks to drive the company further. A manager, on the other hand, is risk-averse. His job is to maintain the status quo of the company. So he cannot afford risks.

Department of CSE Page 15 of 35

WHAT IS THE BUSINESS PLAN

A **business p an** is wn 'ttcn **document** propar **d** by tt centrepren our th;:it describes all the relev;:int cxtcrnJI and int rn<| c crncn nvo veu in startine a new venture.

It addresses both short- Jnd lone -term dcci ion mL kine. The busine !.i plan is like a road map for the busine; Js' developrrwnl.

The Internet also provides outlines for businesepI nnin.

Entrepreneurs can also hire or offer cquity to 1r1other person to provide expertise in preparing the business phn. In developine the business plan the entrepreneur can determine how much money will be needed from new and existing sources.

PLANNING AS PART' OF THE BUSINESS OPERATION

Planning is a process that never end.,. In the c HlytJBC.:i, the entrepreneur should prepare a preliminary plan. The plan will be flnnll2cd as the cntcr'prisc develops.

SCOPE AND VALUE OF THE BUSINESS PLAN WHO READS THE PLAN

The business plan must be comprehensive enough to address the concerns of employees, investors, bankers, venture capitalists, suppliers, and customers. Three perspectives need to be considered:

- 1. The *entrepreneur* understands the new venture better than anyone.
- 2. The *marketing perspective* considers the venture through the eyes of the customer.
- 3. The *investor* looks for sound financial projections. The depth of the business plan depends on the size and scope of the proposed venture.

The business plan is valuable to the entrepr neur a_nci investors because: It helps determine the feasibility of the venture in a designated market.

Department of CSE Page 17 of 35

The business plan is valuable to the entrepreneur and investors because:

- It helps determine the feasibility of the venture rn a designated market.
- 2. It gives guidance in organizing planning activities.
- 3. It serves as an important tool in obtaining financing. Potential investors are very particular about what should be included in the plan. The process of developing a business plan *also* provides a self-assessment of the entrepreneur.

HOW DO POTENTIAL LENDERS AND INVESTORS EVALUATE THE PLAN

Potential suppliers of capital will vary in their needs and requirements in the business plan. Lenders are primarily interested in the ability of the new venture to pay back the debt and focus on the four C's of credit:

- The entrepreneur's credit history or character.
- 2. -Their ability to meet debt and interest payn1ents {cash flow.)
- 3. The *collateral* or tangible assets being secured.
- 4. Equity contribution or the amount of personal equity that has been invested by the entrepreneur.

Department of CSE Page 18 of 35

PRESENTING-THE PLAN

It is often necessary for an entrepreneur to orally present the business plan to investors. Typically the entrepreneur provides a short (10 -20 minutes) presentation of the business plan. The entrepreneur must sell their business concept in a short time period. A venture capitalist or angel group n1ay also ask the entrepreneur to present the plan to their partners before making a final decision.

- 1. To identi fy information needs and sources for business planning.
- 2. To enhance awareness of the ability of the Internet as an information resource and marketing tool
- 3. To present helpful questions for the entrepreneur at each stage of the planning precess.
- 4. To understand how to monitor the business plan

Q perations Information Needs

The entrepreneur may need ir1forn1nt.ion on:

- •location
- Manufacturing operations
- •Raw n1aterials
- Equipment
- ·Labor skills
- Space
- ·operating cost

Each ite,m rnay require some research but 1s needed by those who will assess the business plan.

USI 1NG THE INTERNET AS A RESOURCE TOOL

Thanks to technology, entrepreneurs are able to access information effid ently, expediently, and at very 11ttle cost.

The **Internet** can serve as an important source of inforn1ation in preparing the business plan.

Information on industry analysis, con1petitor analysisr and measurement of market potential can be located.

In addition, the Internet a so provides opport nities for actually marketing the new ventures products. A '-"-1eb site, or home page, typically describes a firm's history, existing products, ba_ckground of the founders, and other information to create a favorable nnage.

Department of CSE Page 20 of 35

The web site can be a vehicle for advertising or for direct marketing.

Many new ventures use web pages to increase sales contacts and reach potential custon1ers.

An entrepreneur can also access competitors' web sites to gain kn ow ledge of their strategy in the marketplace.

To gather inforn1ation anonymously the entrepreneur can also investigate newsgroups. All that is needed to use these sources is a small investment in hardware and software.

WRITI NG THE BUSINESS PLAN

The business plan should be con1prehensive enough to give a potential investor a complete understanding of the venture

Introductory Page

The *title* page provides a brief summary of the business plan's contents, and should include:

- 1. The name and address of the company
- The name of the entrepreneur and a telephone number
- 3. A paragraph describing the company and the nature of the business
- 4. The amount of financing needed
- 5. A state ent of the confidentiality of the report I also sets out the bas,c concept t,a

Department of CSE Page 21 of 35

Executive Summary

This is prepared after the total plan is writt_en..It should be one to two pages in length and should h1ghl1ght the key points in the business plan.

The summary should highlight in a concise manner the key points in the business plan. Issues that should b addressed include:

- 1. Brief description of the business concept
- 2. Any data that support the opportunity for the venture.
- 3. Statement of you this opportunity will be pursued.
- 4. Highlight some key financial results that can be achieved B cause of the limited scope of the sun1mary, the entrepreneur should ascertain what is important to the audience to whom the plan is directed.

Environmen tal and Industry Analysis

The entrepreneur should first conduct an **environmental analysis** to identify trends and changes occurring on a national and international level that may impact the new venture. Examples of environmental factors are:

Economy Culture Technology Legal concerns All of the above external factors are generally uncontrollable Next the entrepreneur should conduct an **industry analysis** that focuses on specific industry trends.

Some examples of industry analysis: S\NOT, PEST, STEER,. PORTER five forces.......

Department of CSE Page 22 of 35

Description of the Venture

The description of the venture should be detailed in this section.

T is _should. begin with the mission statement or company mission, which describes the nature of the business and what the entrepreneur hopes to accomplish.

The new venture should be described in detail, including the product, location, personnel background of entrepreneur, and history of the venture.

The emphasis placed on location is a function of the type of business. Maps that locate customers, competitors, and alternative locations can be helpful. If the building or site decision involves legal issues, the entrepreneur should hire a lawyer.

Production Plan or Operations Plan

If a new venture is a manufacturing operation, a production plan is necessary.

This plan sho ld whether or not the process is to be subcontracted.

. . carried out by the entrepreneur, the If the manufactu ing hysical plant layout and machinery plan should describe te p and equipment needed.

t man $_U$ -facturing the is section would be If the venture ,s no Thé entrepreneur would nee $_{-}^d$ ts titled operational plan. alsteps in completing a bus1nes describe the chronologic transaction

Department of CSE Page 23 of 35

Marketing Plan

The marketing plan describes how the products will be distributed, priced, and promoted. Potential investors regard the marketing plan as critical to the venture's success.

Organizational Plan

The organizational plan section should describe the venture's form of ownership. If the venture is a corporation, this should include the number of shares authorized, share options, and names and addresses of the directors and officers.

It is helpful to provide an organization chart indicating the line of authority. This chart shows the investor who controls the organization and how members interact.

Assessment of Risk

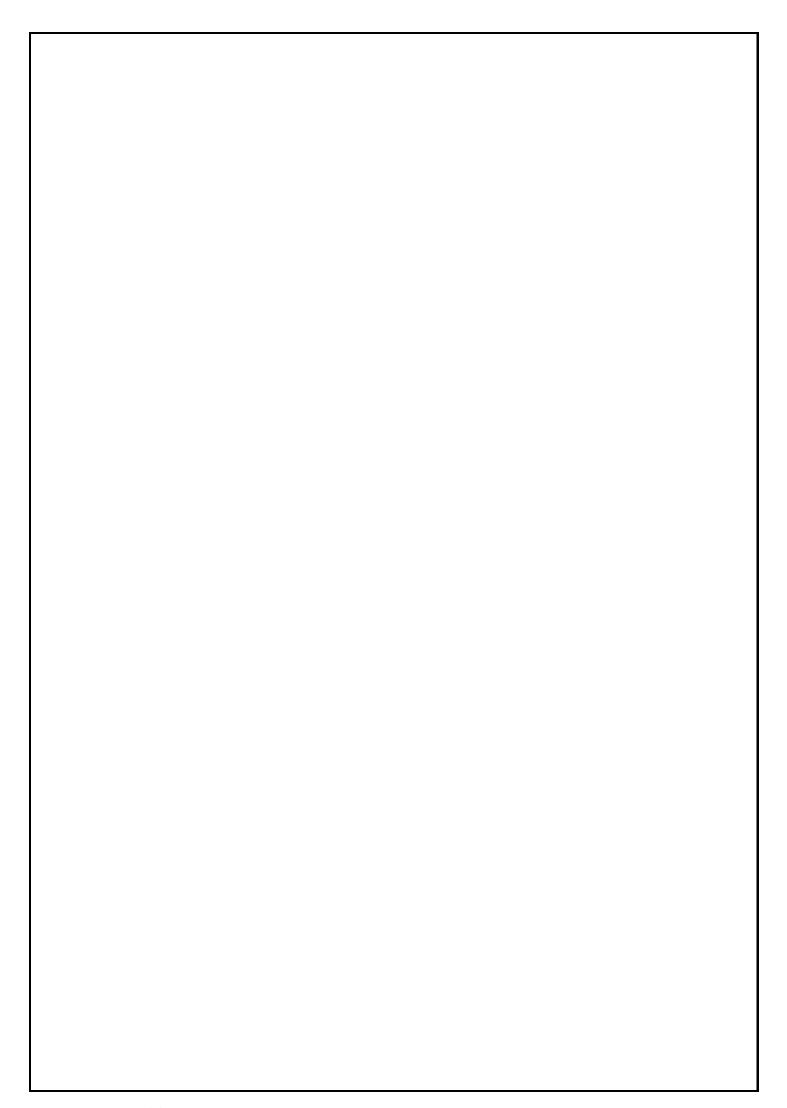

It is important that the entrepr neur make an assessment of risk in the following manner: The entrepreneur should indicate the potential risks to the new venture.

Next should be a discussion of what might happen if these risks become reality.

Finally the entrepreneur should discuss the strategy to prevent, minimize, or respond to these risks.

The entrepren_eur should also provide alternat, ve should these risk factors occur strategies

Department of CSE Page 24 of 35

Department of CSE Page 25 of 35

Financial Plan

The financial plan determines the investment needed for the new venture and indicates whether the business plan is economically feasible. The entrepreneur should summarize the forecasted sales and expenses for the first three years. Cash flow figure for three years are needed, with the first year's projections provided monthly. The projected balance sheet shows the financial condition of the business at a specific time.

USING AND IMPLEMENTING THE BUSINESS PLAN

The business plan is designed to guide the entrepreneur through the first year of operations.

- •It should contain control points to ascertain progress.
- •Planning should be a part of any business operation. Without good planning the employees will not understand the company's goals and how they are expected to perform their jobs.
- $^{\bullet}$ Bankers say that most $b_{u}s$ inesses fail because of the entrepreneur's inability to plan effectively.

Measuring Plan Progress

Plan projections will typically be made ona entrepreneur should check key areas more freque h firm can ensure maximum loventory control by controlling in entory, to the customer. Production contra against day-to-day operating costs.

- Quality control Quality control depends on system used.
- 2. Sales control Information on units, dollars, $a^{\mbox{nd}}$ $n_{\mbox{\tiny perific}}$ products sold should be collected.
- 3. expenditures.
- 4. The new venture should control the amount of money paid out

V/HY SOME BUSINESS PLANS FAIL

A poorly prepared business plan can be blamed on:

- •Goals set by the entrepreneurs that are unreasonable.
- ·Goals those are not measurable.

Tobe successful

- •Goals should be specific.
- •They should also be measurable and should be monitored over time.

The entrepreneur who has not made a total commitment to the business will not be able to meet the venture's demands of the venture. Investors will not be positive about a venture that does not have full-time commitment. Investors will typically expect the entrepreneur to make significant financial commitment to the business. Lack of experience will result in failure unless the entrepreneur can gain knowledge or team up with someone. The entrepreneur sh_ould also document customer needs before preparing the plan

16Sources of New Ideas for Entrepreneurs

The entrepreneurial idea is a feasible, financially sound, technically possible, and socially acceptable idea of a project or product that may have utility lo perspective customers.

No one can come up with an idea and, in the *very* first instance convert it into a business opportunity and start a small business on that basis.'

Department of CSE Page 27 of 35

The majority of good business opportunities do notcomesuddenly.

It comes from an established mechanism to generate many ideas sothat at least one idea has the potential for a business opportunity. It requires a series of steps to finalize it into a profitable business.

This is the first step in idea generation and evaluation.

Entrepreneurs throughout the world use the following sources to tap to identify good ideas:

16 Sources of New Ideas for Entrepreneurs

- 1. Customers
- 2. Existing organization
- 3. Distribution channels
- 4. Government
- 5. Financial institutions and Development Agencies
- 6. Research and Development
- 7 Trade Shows, Fairs aid Exhibitions
- 8. Focus Groups
- 9. Brainstorming
- 10. Collective Notebook Method
- 11. Heuristics Method
- 12. Checklist Method
- 13. Synectics Method
- 14. Dream Approach
- 15. Market Gap Analysis
- 16. Life-style anal Y5°1 Method

1. Customers

Prospective customers know best what they want and thehabits/taS^tes that will be popular shortly.

New product or service ideas may come from cust or reactions to the present product and the expected product idea.

Contacts with prospective consumers can also reveal the features that should be built into a product or service.

Ad by Value impression

The attention to the customers can take the form of informally monitoring potential ideas and needs or formally arranging surveys among prospective customers.

Care needs to be taken to ensure that the idea or need represents a large enough market to support a new venture.

2. Existing organization

Competing products and services of existing organizations and evaluation thereof is a successful source of new ideas.

Frequently, this analysis uncovers ways to improve on these offerings, resulting in a new product that has more market appeal.

The analysis of profitability and break-even level of various industries or organizations indicate promising investment opportunities which are profitable and relatively risk-free.

An examination of the capaci y utilization of various industries provides information about the potential for further investment.

3. Distribution channels

Department of CSE Page 29 of 35

Member of the distribution channels; intermediaries, transient customer preference, and possible expectations may be a good business idea.

Not only do channel members frequently have suggestions for completely new products, but they can also help in marketing the entrepreneur's newly developed products.

4.Government

The government can be a source of new product ideas in many ways.

First, the files of the Patent Office contain numerous new product possibilities. They can suggest other more marketable new product ideas.

Secondly, new product ideas can respond to government regulations, industrial policy, investment guidelines, annual plan, Five-year plan, etc.

Thirdly, several government agencies nowadays assist entrepreneurs in discovering evaluating business ideas.

5. Financial institutions and Development Agencies

These organizations also provide ready projects and offer suggestions to potential entrepreneurs who help identify promising projects.

Community Development Financial Institutions Fund, Small Business Administration, Office of Advocacy, United States Chamber of Commerce, Economic Development Administration, Small Business and Entrepreneurship Council, House Committee on Small Business, and many other bodies in the USA are working to improve entrepreneurship and small businesses.

6. Research and Development

The entrepreneur's own "research and developmen^{t,,,,s} the largest source of new r*deas. It may be a more forma1 en^d eavor connected with one's current employment or an informal laboratory i11 the private premises.

Formal institutional research and development are often better equipped, enabling the entrepreneur to conceptualize and develop successful new product ideas.

But many amazing product ideas have come from informal research endeavors at the private level.

7. Trade Shows, Fairs aid Exhibitions

These sources display new products and innovations in processes and services.

An innovative entrepreneur can get produc; t ideas to adapt or modify and produce with indigenous materials and technology.

8. Focus Groups

Focus groups are good sources of product ideas.

A moderator leads a group of people through an open, in-depth discussion rather than simply asking questions to solicit participant response; for a new product area, the moderator focuses the group's discussion in either a directive or a nondirective manner.

The group of 8 to 14 pa_rticipants is stiml. Jlated by comments from other group members to conceptualize and develop a new product idea to fulfill market needs.

This is an excellent method for initially screening ideas and conceptstoo.

9. Brainstorming

Department of CSE Page 31 of 35

The brainstorming method for generating new product ideas is based on the fact that people can be stimulated to greater creativity by meeting with others and participating in organized group experiences.

This method would be effective if the effort focuses on a specific product or market area. The following four rules should be followed when using this method:

- 1. No criticism is allowed by anyone in the group no negative comments.
- -- Freewheeling is encouraged- the wilder the idea, the better.
- .). Quantity of ideas is desired- the greater the number of ideas, the greater the likelihood of useful ideas emerging.
- 4. Combinations and improvements of ideas are encouraged ideas of others can still produce another new idea.

The brainstorming session should be fun, with no one dominating or instituting the discussion.

10. Collective Notebook Method

In the collective notebook method, a small notebook that easily it's in a pocket, containing a statement of the problem, blank pages, and any pertinent background data, is distributed.

Participants consider the problem and its possible solutions, recording ideas at least once but preferably three times a day.

At the end of the month, a list of the best ideas is developed, along with any suggestions.

11. Heuristics Method

Heuristics relies on the entrepreneur's ability to discover through a progression of thoughts, insights, and le rning.

Department of CSE Page 32 of 35

The technique is probably used more than imagined because entrepreneurs frequently must settle for an estimated outcome of a decision rather than a certainty.

One specific heuristic approach is called .the heuristic ideation technique (HTT).

The technique involves locating all relevant concerts - that could be associated with a given product area and generating a set of all possible combinations of ideas.

Value analysis Method: The value analysis technique develops methods for maximizing value to the entrepreneur and the new venture. It is a method for developing a new idea by evaluating the worth of aspects of ideas.

Under this technique, regularly scheduled times are established to develop, evaluate, and refine ideas.

12. Checklist Method

A new idea is developed through a lot of related issues or suggestions.

The entrepreneur can use the list of questions or statements to guide the direction of developing entirely new ideas or concentrating on specific "idea" areas. The checklist may take any form and be of any length.

One general checklist is:

- Put to other uses? New ways to use as is? Other uses if modified?
- Adapt? What else is like this? What other ideas does this 'suggest? Does the past offer parallel? What could I copy? Whom could I emulate?
- Modify? New twist? Change meaning, sour, motion, odor, form, shape? Other changes?
- Magnify? What lo add? More time? Greater frequency? Stronger? Larger?
 Thicker? Extra value? Plus ingredient? Duplicate? Multiply? Exaggerate?
- Minify? What substitute? Smaller? Condensed? Miniature? Lower? Shorter?
 Lighter? Omit? Streamline? Split up? Understated?

Department of CSE Page 33 of 35

- Substitute? Who else instead? Wh . material? Another proce rollent at else instead? Another ingredient? Other Other tones of voice? ss. t er power? Other places? Other approaches?
- Rearrange? Interchange com ₇T ponents? Other Pattern? Other layouts" Other equen e;. ranspose cause and effect? Change pact? Change schedule?
- b ev; rsed₇r;nsp se positive and negative? How about opposites? Turn ii ac wahr · urn It upside-down? Reverse roles? Change shoes? Turntables? Turn ot er cheeks?
- Combine? How about b d a en , an alloy, an assortment, an ensembl ? Combine units. Combine purposes? Combine /appeals? Combine ideas?

13. Synectics Method

Synectic is a creative process that forced individuals to solve problems through four analogy mechanisms: 'personal, direct, symbolic, and fantasy. A group works through a two-step process.

The first step is to make the strange familiar.

Through generalizations or models, this *involves* consciously reversing the order of things and putting the problem into a readily acceptable or familiar perspective, thereby eliminating the strangeness.

Once the strangeness is eliminated, participants engage in the second step, making the familiar strange through personal, direct, or-symbolic analogy, which ideally results in a unique solution being developed.

Dream Approach

The big dream approach to coming up with a new idea requires that the entrepreneur dreams about the problem and its solution- thinking big.

Every possibility should be recorded and investigated without regard to all the negatives involved or the resources required.

Department of CSE Page 34 of 35

In other words, ideas should be conceptualized without any constraints until an idea is developed into a workable form

15. Market Gap Analysis

Market gap analysis is a powerful method used to uncover areas in the market in which the needs and wants far exceed the supply.

This method has a hopper or gathering effect of converting everyday information into bunches of lucrative product and service gaps that few have thought of before.

16. Life-style analysis Method

Entrepreneurs can use lifestyle analysis effusively for product-service ideas. Lifestyle is a person's pattern of living expressed in his or her psychographics (Kotler and Armstrong. 181:2001).

It involves measuring consumers' major activities (work, hobbies, shopping, sports, social events), interests (food, fashion, family, recreation), and opinions (about themselves, social issues, business, products).

The lifestyle analysis will help entrepreneurs understand new needs and want under the changed conditions. It will also reflect the changing consumer values that may be a good source of product-service ideas.
