Report of an Event on "MTA-Data Base Fundamentals"

From 28th February, 2019 to 02nd March, 2019 all the 4th-B.Tech(ECE & CSE) Students are participated in MTA-Data Base Fundamentals Programme conducted by TASK and organized by Training and Placement Cell in presence of Mr K Sujith

Having taught computer certification courses to high school students, college students, and US Intelligence Community agents, the MTA is what I consider the perfect certification for someone looking to get into the IT industry.

What is the MTA exactly? Microsoft defines it as "an entry-level certification that validates fundamental technology knowledge." It is a family of certifications developed to help people new to the IT industry show fundamental competency in various IT technologies. It is part of their Microsoft Virtual Academy program and was designed for the secondary and post-secondary (college) students. It doesn't mean however that you must be a student to take these exams.

Here are other great features of MTA Certifications:

- There are fourteen different exams covering a wide range of skill sets.
- MTA certifications don't expire; it offer a lifetime certification.
- You only need to pass one exam to get the MTA certification.
- Microsoft has specifically designed the MTA certifications to be part of the natural pathway towards other higher-level Microsoft certifications.
- The exams cost a fraction of what other certifications charge.
- It is backed by one of the most well-known IT companies in the world, Microsoft.
