Report of an Event on “Oracle-Java Programming”

From 17th September, 2018 to 22nd September, 2018 all the 3rd-B.Tech(ECE & CSE) Students are participated in Oracle-Java Programming conducted by TASK and organized by Training and Placement Cell in presence of Mr Arun Reddy

The main benefit of OCPJP certification is that it helps in improving knowledge and in-depth understanding of the Java language. It also helps you to brush up and remove a number of gaps across OOPs concepts and the language as a whole.

One of the most significant advantages of Java is its ability to move easily from one computer system to another. The ability to run the same program on many different systems is crucial to World Wide Web software, and Java succeeds at this by being platform-independent at both the source and binary levels.

Java is an object Oriented Programming (OOP) language. It incorporates almost every OOP features. Object creation through object template i.e. class, data abstraction and encapsulation, data and code sharing through inheritance, overloading concept through polymorphism, and data/process hiding etc.

A junior Java developer should be familiar with the programming languages that are often used on the job. Junior Java developers must be fluent in Java, as well as JavaScript, HTML, and CSS. Besides this, one must have a good understanding of System Design and Architecture.
